Summary

Aspiring IoT and Automation Engineer with hands-on experience in embedded systems, smart devices, and connected technologies. Skilled in developing IoT-based solutions, integrating hardware and software components, and working with microcontrollers, communication protocols, and programming languages. Passionate about applying emerging technologies to build efficient and intelligent systems for real-world applications.

Education

- Sino-Pak Dual Diploma in Internet of Things Application Technology (IoTAT)** 2023 - 2026
Applied Technologies Institute Network (ATIN) - NLC, Mandra, Pakistan (2023-2025)
Jiangxi Polytechnic University, Jiujiang, Jiangxi, China (2026 - International Training)
- Intermediate (FSc Pre-Engineering)** 2021 - 2023
Aspire College, Sarai Alamgir
- Matriculation (Science Group)** 2019 - 2021
Sarai Alamgir

Skills

- Mobile App Development
- Internet of Things (IoT) & Smart Systems
- Embedded Systems & Microcontrollers (STM)
- Wireless Communication (ZigBee, UART)
- Emerging Technologies & Automation
- Programming: Java, Python, C++
- Backend & Database Integration
- Hardware and Software integration

Languages

- English (Intermediate)
- Urdu (Native)
- Chinese (Basic)

Technical Tools

- Arduino IDE
- STM32CubeIDE
- Android Studio
- MySQL

Projects & Practical Experience

- Developed an IoT-based monitoring system using ESP32/STM32 microcontroller
- Integrated temperature sensors for real-time data collection
- Implemented wireless communication for data transmission
- Displayed sensor data for monitoring and analysis
